EXPERIENCE

Mobile/Web Developer | GeoFli | Missoula, MT

Aug 2018 - Feb 2019

- Built and released Resale Pal, a cross platform mobile application allowing users to keep track of personal vehicle records and find and follow other vehicles.
- Released WordPress plugin for GeoFli, allowing GeoFli customers to easily append GeoFli script tags to their WordPress instances.
- Constructed custom landing page for soap manufacturer, driving more leads for large quantity customers.
- Built out customized content management for a state university system utilizing Statamic.

Software Engineer | GatherBoard | Missoula, MT

Sept 2017 - May 2018

- Serve as software engineer and project manager for cross platform mobile app, managing a small team of developers.
- Utilize Angular and the Ionic Framework to build out mobile platform for event curation/sharing service.
- Integrate system data into mobile app to communicate with native device features (i.e. geolocation, push notifications, etc).
- Develop UI designs and mockups to be implemented throughout dev cycle.

Software Developer Intern | Orbital Shift | Missoula, MT

Jan 2017 - May 2018

- Built and deployed the Orbital Shift Employee App and the Orbital Shift Punch Clock App using the Ionic Framework.
- Handle authentication, session persistence and UI/UX design for Android/iOS.
- Utilize GPS geolocation APIs to detect if user is at pre configured location.
- Build and maintain API, using MS SQL Server and Web API 2 for GET/POST/PUT methods to modify and view user and business data.

Software Engineering Intern | ESPN | Bristol, CT

Sept 2016 - Nov 2016

- Built network configuration tool for ESPN's BottomLine service using Node, Express, jQuery and Handlebars.
- Constructed testing suite utilizing Mocha, Chai and Nightwatch, testing for data validation and UI functionality.
- Wrote test scripts for ESPN.com, reviewed pull requests and performed quality assurance automation in test-driven dev environment.
- Worked with diverse teams of engineers within the Bristol office and with dozens of contractors throughout the world.
